WHY CONCRETE BLOCK

Concrete block homes are more energy efficient. They are storm, fire, termite and mold resistant. They offer almost unlimited design flexibility and long-term durability. The real question is: why settle for anything else?

ENERGY EFFICIENCY

Homes built with concrete block hold cool air inside, even in the dead heat of a Florida summer, which could lower cooling bills by up to 50 percent.

STORM RESISTANCE

Typical storm-resistant building techniques include standard 8-inch concrete block to wind and waterproof a home, significantly reducing the risk of damage and resulting in lower insurance premiums.

TERMITE RESISTANCE

Termites are known as silent destroyers because of their ability to chew through wood, flooring and even wallpaper undetected. In contrast, concrete block is impossible for termites to eat, eliminating the threat of damage.

MOLD/MILDEW RESISTANCE

Mold and mildew cannot grow on concrete block, as it does not provide a food source for the fungus. In addition, homes built with concrete block are airtight – even in the face of Florida's torrential rains – and keeping moisture out is key to preventing mold and mildew in the rest of the home.

NOISE REDUCTION

Concrete block offers excellent noise control in two ways - by blocking sound and by absorbing noise intensity.

FIRE RESISTANCE

On average, home fires result in \$7.32 billion in property damage a year. As a non-combustible building material, concrete block won't burn, soften or bend during a fire, offering superior protection over wood-frame construction.

DURABILITY

In addition to these other benefits, concrete block does not rot, rust, warp or require extensive maintenance, which means homes maintain their curb appeal and value.

Building a new home?

Caution- Buyer Beware!

Just like the old saying goes, “a chain is only as strong as its weakest link”, your home is no different. To ensure its strength and integrity, your new home should always be 100% concrete block construction-first and second floor. Why take the chance? “From Top to Bottom” isn’t just a slogan. It’s the key to making sure your home is as safe and secure as it can possibly be.

Life’s Better with Block.
